In the Claims:

Please amend claims 12, 16, 27, 37, and 56 to read as follows:

- (Thrice Amended) 12.
- A recombinant fusion polypeptide comprising:
- a multivalent immunogenic portion wherein the immunogenic portion (a) comprises at least two immunogenic polypeptides from Group A streptococcal M protein, the polypeptides comprising at least 10 amino acids and capable of eliciting an immune response against Group A Streptococci; and
- a carboxy-terminal polypeptide that protects the immunogenicity of the (b) immunogenic portion, wherein the carboxy-terminal polypeptide is a reiteration of at least one immunogenic polypeptide from the amino-terminal of the immunogenic portion.

The polypeptide according to claim 12 wherein the 16. (Thrice Amended) immunogenic portion consists of six-immunogenic polypeptides, wherein the polypeptides are an amino-terminal portion-of at least one Group A streptococcal M protein.

- A composition for promoting an immune response 27. (Thrice Amended) against Group A Streptococci, comprising:
 - a recombinant fusion polypeptide, comprising: (a)
- a multivalent immunogenic portion wherein the immunogenic portion (i) comprises at least two immunogenic polypeptides from Group A streptococcal M protein, the polypeptides comprising at least 10 amino acids and capable of eliciting an immune response against Group A Streptococci; and
- a carboxy-terminal polypeptide that protects the immunogenicity of the immunogénic portion, wherein the carboxy-terminal polypeptide is a reiteration of at least one immunogenic polypeptide from the amino-terminal of the immunogenic portion; and
 - a pharmaceutically acceptable excipient or diluent. (b)
